- ❖ Integrating APIs and ensuring efficient client-server communication.
- ❖ Debugging and enhancing web application performance for optimal user experience.
- ❖ Writing maintainable, TypeScript-based code and ensuring adherence to coding standards.
- ❖ Collaborating with teams to deliver functional, user-centric web solutions within deadlines.

CREDENTIALS

Education

- ❖ B.E (CSE) from the Basavakalyan Engineering college,Basavakalyan.
- ❖ PUC in Science from Karnataka Pre-University Examination Board, Humnabad.
- ❖ SSLC from Karnataka Secondary Education Examination Board, Humnabad.

Functional Skills:

- Web development.
- Authentication and Authorization
- Component-Based Architecture
- State Management
- Performance Optimization.
- Communication and Team work.

Technical Skills:

1. Frontend Development

- Javascript framework(routing, modules, TypeScript, RxJS, lazy loading, forms, dependency injection)
- HTML5,CSS3
- Bootstrap
- Angular/TypeScript
- State Management
- Component Libraries (Angular Material, PrimeNG)

• Backend Development

- Basics of Python(Django)
- Authentication and Authorization(JWT)
- Database management MySql

2. Version Control

- Git/GitHub

Certifications:

- Project Trainee at ISRO(Indian Space Research Organization)-Chandrayaan 2 Rover Scheduling Operation and Timeline viewer.
- Certified As a Full Stack Python Developer in Learning Academy.
- Certified As a Devops Engineer by Edureka.
- Participated in National conference in BigData
- Participated and Presented in National conference in DataMining.
- Attended Workshops in Web Development.
- Workshops in Machine Learning/Artificial Intelligence.

Projects:

- Personal Portfolio Website using Angular
- Blog Platform using Angular and Node.
- Diabetics Prediction Using ML, Logistic Regression and Random Forest.

PROFICIENCIES EXPLAINED

- Proficient in developing single-page applications (SPAs) using Angular 16.
- Experienced in building dynamic user interfaces with reusable and maintainable components.
- Expertise in creating secure login, registration, and authentication workflows.
- Good understanding of object-oriented programming
- Expertise in configuring guards for route protection and lazy loading for performance optimization.
- Proficient in making web applications user-friendly and visually appealing.
- Ability to collaborate effectively with cross-functional teams to deliver high-quality projects on time.

Project No: 01

Company : Linova Info Pvt Ltd, Bangalore, Karnataka
Project : ConceptO Diagnostics
Angular Version : Angular 16
Designation : Software Engineer

Roles and Responsibilities:

- Customized the login process to support different user roles (User, Doctor, Admin) with role-based redirection after login.
- Ensured appropriate dashboards and functionalities were displayed based on the authenticated user's role.
- Configured Angular Guards to restrict access to unauthorized routes and components.

Project No: 02

Company : Linova Info Pvt Ltd, Bangalore, Karnataka
Project : E-commerce
Angular Version : Angular 16
Designation : Associate Engineer

Roles and Responsibilities:

- Developed Secure Authentication Systems
- Implemented user authentication using JWT and Angular Guards to protect routes and ensure secure access.
- Collaborated with backend developers to integrate authentication APIs using RESTful services.
- Created intuitive and responsive login, signup, and password recovery modules using Angular Forms
